

LEXICON™

INFORMATION TECHNOLOGY

Lexicon Technical Services Center (TSC) provides fast, reliable end user computing support, deployment of equipment, and IT training. Through various channels such as phone, email, and self-service, the TSC is the front-line support when technology issues arise. Offering incident reporting and troubleshooting coupled with request fulfillment, Lexicon is available to help your employees focus on their work, and not on technology.

The Information Technology group develops and maintains our proprietary law firm software and helps integrate our custom software with other core systems.

Lexicon Security can design and provide consulting services that will assist you in protecting data, endpoints, infrastructure and web applications. Testing can be performed that provides investigating, reporting, and recommended remediation steps based on the latest threat intelligence. The Security team can also assist in remediating threats to your assets.

Let us handle your ever-evolving technology needs so you can focus on your clients.
